

The continuous Innovation in Card Personalization

▶ Performance / Printing	up to 1300 cards per hour monochrome
▶ Card Feeder Module	500 – 3000 cards CR-80
▶ Card Output Module	500 – 3000 cards CR-80
▶ MAG & Chip processing Module	hybrid operation magnetic stripe & chip
▶ Top & Bottom Chip processing Module	for both sides operation
▶ 2 x Chip encoding Module	for small SIM card application with less 5 secs.
▶ 9 x Chip encoding Module	for SIM applications with more than 5 secs.
▶ Contactless encoding Module	for RFID applications
▶ 5 x Contactless encoding Module	for multiple RFID applications
▶ Thermal printing Module	for mono and color printing 300 Dpi
▶ Inkjet printing Module	for High-Speed printing with up to 3000 cph
▶ Laser Engraving Module	for High-Security marking
▶ Multiple Card Input & Output Magazine	for multiple card jobs at the same time

plus a revolutionary, modular software concept for

***GSM-Cards
ID-Cards
SIM-Cards
Financial-Cards
Loyalty-Cards***

Innovative Card Systems and its software partner can provide a software platform with professional solutions for the card industry.

The modular software concept allows an integration of any personalisation module developed by Innovative Card Systems, regardless whether it is available today or tomorrow.

ICP-1000 Card Personalisation System

The innovation in professional card personalisation
